The Professional Practice (Co-op) program at the University of Cincinnati provides students the most comprehensive professional preparation available by exposing them to career options and the professional world. This program allows students to alternate semesters of rigorous academic study with semesters of paid, professional work in their field. During co-op semesters, students engage in the real world of work, promoting their sense of independence and professional maturity. In addition, participation in the program allows students to explore career options and may increase post-graduation employment opportunities.

Each student admitted into Professional Practice is assigned to a co-op faculty member who helps the student identify program objectives and suggests work assignments. This faculty member also functions as a link between the student and the co-op employer.

Locations of employment vary considerably from one year to the next. Also, a student’s academic program may be an important factor in determining the appropriate location for job options.

U.S. law only allows international students to work a maximum of twenty hours per week on their college campus. However, international students enrolled in co-op can work full time (forty hours or more per week) during co-op semesters.

**COOPERATIVE EDUCATION**

Students do not pay tuition while they co-op!
